

MOVE FORWARD WITH US

Mondovi Public Library "Beyond Books" Capital Campaign

With generous support, we will grow and diversify services, build relevant multi-channel resources and create inspiring spaces to ENGAGE, EMPOWER, and EXPAND the community.

A transformed library building will, in turn, transform all those who enter it. Mondovi Public Library endeavors to raise **\$1.5M in capital funds** to recreate, expand, and move our library forward. Investment in the library creates a dynamic learning environment and a suite of services that will follow and inspire us throughout our lifetimes. Help us fund authentic learning, unbridled curiosity, genuine collaboration, inspired exploration, boundless creativity, and deepened understanding.

Summer Reading Program

ENGAGE

Re-imagined iconic facade beckons newcomers to come inside, explore, learn and grow.

Vibrant children's area engages early learners, ignites passion and fosters curiosity.

Dedicated young adult space encourages discovery of new ideas and provides an inviting location to tackle homework.

Curated adult space compels lifelong learners to find respite in reading, develop new interests, and reconnect with old friends.

EMPOWER

Newly constructed entrance will empower those with disabilities by creating equitable access to all library services and resources.

Reinvented study areas provide focused learners a dedicated space free of distractions.

Floor plans anchored in thoughtful configuration will enhance staff flexibility and improve guest experience.

Dedicated community spaces will foster increased opportunities, improved partnerships and brilliant new ideas.

EXPAND

Reinvented children's spaces will eliminate unsupervised secondary access points and improve staff sight lines, fostering an improved sense of security.

Reimagined interiors will create inviting spaces that are full of natural light, inspiring people to gather, collaborate, and connect.

Defined program areas will alleviate overcrowding and allow learners of specific age groups to assemble independently and pursue distinctly relevant content.

Dedicated technology spaces will align overall programming with 21st century interactive learning.

"A library in the middle of a community is a cross between an emergency exit, a life raft, and a festival. They are cathedrals of the mind; hospitals of the soul; theme parks of the imagination...they are the only sheltered public places where you are not a consumer, but a citizen, instead. A human with a brain and a heart and a desire to be uplifted..."

- Caitlin Moran
